

Mexico QSFP28 Optical Module DML

Overview

The QSFP28 100GBASE-LR 2km module is designed for data transmission using two single-mode (SM) fibers. It transmits data at speeds of up to 100 Gbps, over distances of up to 2km. It works with 4 CWDM 25Gb/s DML lasers and has 2xLC/UPC duplex optical connector type. The 100 Gigabit Ethernet signal is carried over four wavelengths multiplexing and demultiplexing. This guide provides the definitive roadmap for selecting, deploying, and troubleshooting QSFP28 transceivers while bypassing the painful trial-and-error phase. Below, you will find comprehensive module comparisons, realistic market pricing, and precise vendor compatibility protocols to ensure a. Cisco ® QSFP28 100G ZR extends 100GbE coherent links from QSFP28 ports reaching up to 80km over dark fiber and up to 300km over amplified Dense Wave Division Multiplexing (DWDM) links. It is widely used in data centers, enterprise core networks, and telecom infrastructure due to its high port density, standardized interface. Optical modules are optoelectronic devices that perform photoelectric and electro-optic conversions.
