

Multimode fiber optic gigabit network slip ring

Overview

Hybrid fibre optic slip rings for transmitting analogue or digital optical signals with data rates of up to 10 GBit. Single-mode or multi-mode fibres for single or multi-channel transmission. Customised and combined power and signal versions are available. Working voltage: 440VAC/DC Configure. Fiber Optic Rotary Joints (FORJs) are to optical signals what electrical slip rings are to electrical signals, a means to pass signals across rotating interfaces, particularly when transmitting large amounts of data. FORJs maintain the intrinsic advantages of fiber end to end. • Could support 1,2,4,6,8,10,12,16,24 channel fiber optic on 360 rotating. The hybrid slip. Everaxis medium-voltage slip rings are modular, customizable rotating electrical interfaces engineered to maintain continuous transmission of power and signals during rotation for demanding industrial applications. br> Combines a FORJ (fiber optic rotary joint) with gold, silver or. Electrical + FORJ Integration: Meridian Laboratory offers a full suite of single and multi-channel fiber optic rotary joints (FORJ) that can be combined with any number of ROTOCON electrical slip rings.
