

National Standard for Galvanized Cable Tray Covers

Overview

Process: Deposits a layer of zinc onto the steel surface through electrolysis. Primary Standard: Specified in GB/T 26941. 1-2011 "Cable Trays - Part 1: General. This standard specifies the requirements for nonmetallic cable trays and associated fittings designed for use in accordance with the rules of the Canadian Electrical Code (CEC) Part 1, and the National Electrical Code® (NEC). The selection of material and finish is a function of the environment in which it is used in a wide range of applications without notice. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Consensus does not 52 of this document.
