

Network Cabinet Sheet Metal Equipment Production Line

Overview

Our modern sheet metal production line integrates laser cutting, CNC bending, precision welding and electrostatic powder coating to deliver consistent quality at scale. High-precision fiber laser cutting ensures clean edges and tight tolerances on cold-rolled, stainless and. Includes CAD/CAM software, CNC control systems, robotic arms, and automated production lines for precision sheet metal processing. Manchester's largest subcontract supplier of precision sheet metal parts, components, and fully assembled pieces Constant Group is a 60,000ft² manufacturing site, based in Oldham, Greater Manchester. Employing over 80 people we offer a full-service package through every stage of the production. Our electrical enclosures and distribution cabinets (up to 2 mm thick) are professionally built using high-quality casings and doors with specialized bending techniques (cabinet depths up to 400 mm from one piece). These components are designed to accommodate various fixing and safety elements. A leading global network equipment manufacturer launched a 2026 customization project for 1,200 sets of sheet metal cabinets, including server cabinets (42U standard), switch cabinets and wall-mounted network cabinets, to meet the deployment needs of large-scale data centers, enterprise computer. Our production lines achieve complete automation, integrating material handling, cutting, bending, and assembly in one seamless system. Designed for industries requiring high flexibility and.
