

Network Security Equipment Lighthouse

Overview

LightHouse™ Unified Integration Platform provides single site and Enterprise level connection and management of disparate systems, inclusive of security technology systems, such as Access, video, audio, IDS, PIDS, Radar, Lidar, HVAC, PLC's, GPS tracking, Alert Notification. LightHouse™ Unified Integration Platform provides single site and Enterprise level connection and management of disparate systems, inclusive of security technology systems, such as Access, video, audio, IDS, PIDS, Radar, Lidar, HVAC, PLC's, GPS tracking, Alert Notification. ex and geographically dispersed. Network Harbor's LightHouse client is now integrated with Software House's C•CURE 9000 and C•CURE 800/8000 access control security solutions. This integration allows users to manage their Software House access control solution, along with security products from a variety of manufacturers, all from. At the core of LivePT is Network Harbor's Lighthouse Physical Security Information Management (PSIM) software. Built on truly open standards, the Lighthouse™ PSIM is unique because of its extreme power and configurability. The constant addition of new edge sites, travel restrictions, staff limitations and more has created the need for full visibility and control – which Lightho network without ever having to step on site. As the control center of the Opegear Network.
