

Network rack delivery time

Overview

The timeline for your pallet racking delivery often hinges on several factors, including the complexity of your order and the production schedule of your chosen supplier. What protection ratings are available?

Are double-wing doors available?

For the PX Rack, only single-wing doors and single-piece. Procuring IT equipment involves complex quoting processes and long product lead times. Once the products are delivered onsite, IT teams must unbox, burn-in, test, configure, and integrate the equipment. They must also recycle or otherwise dispose of the packaging. Few months out now, usually can be accounted for in projects. It's usually 8-16 weeks maximum which. Management wants to get in ASAP as we're currently month-to-month on the current office. I'm sure the resellers/vendors will promise that they can deliver in X weeks/months, but I just want to know to know what various vendors (Cisco, Aruba/HPE, Juniper, PA, Fortinet, etc) will probably come back. From routers and switches to patch panels and UPS devices, understanding how to leverage rack-mountable solutions is key to optimizing your network's physical layout.
