

No internet connection when fiber optic cable is plugged into router s LAN port

Overview

Restarting your router, checking your modem connection, and resetting network settings often resolve the problem quickly. A quick restart of your router and modem can often re-establish the. If your router shows it's connected but you can't access the internet, don't panic—this is a common issue with simple fixes. You'll know this is your issue if anything that connects to your router is not getting an internet connection, or if the lights on it are flashing red; don't confuse a. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. Make sure: The broadband home router is plugged directly into a working electrical wall outlet (not a power strip). If an Internet or LAN port isn't working correctly on your router, you can use an Ethernet cable to perform a loopback test and check the port.
