

Norwegian OSFP optical module 40G

Overview

The series of product adopts LC or MTP/MPO connector and operates over Single Mode or Multimode optical fiber. They can be used for connections from 150m up to 40km and are suitable for 40G Ethernet to Breakout to 10GBASE-SR Ethernet or Optical Transport Network OTU3. FS 40G QSFP+ optical transceiver module solutions offer a full range of QSFP+ modules from 150m to 80km reach, and used for high-density switching, routing and data center applications. Click to get your 40G QSFP+ transceiver modules from nearby warehouses. Trusted by 260K+. Optical transceivers have revolutionized data transmission, providing high-speed, long-distance, and secure data transmission capabilities. Eoptolink QSFP+ (Quad Small Form-factor Pluggable Plus) is a new Multi-Source Agreement (MSA) for high speed application, such as 40G-BASE, which provide four channels of data in one pluggable interface. Each channel is capable of transferring data at 10Gbps and supports a total of 40Gbps. Unlike the backward-compatible QSFP-DD, OSFP introduces a slightly larger mechanical form factor. Depending on transmission rates, optical modules are classified into 400G, 100G, 40G, 25G, 10G, 1G, and 100M optical modules.
