OBD Passive Optical Splitter

Overview

These units are low-profile splitter/pass-throughs, and are ideal for AutoMeter products like AirDrive, DashLink, DashControl and SmartConnect instrumentation. They also provide additional, easy-to-access connection points for other onboard devices requiring access to the. A Passive Optical Network (PON) is a fiber optic technology utilizing point-to-multipoint topology and optical splitters to deliver data from a single transmission point to multiple user endpoints. Passive refers to the unpowered condition of the fiber and splitting/combining components. ai is a startup founded by George "Geohot" Hotz, working to solve self-driving cars while delivering shippable intermediaries. The Splitters are designed with one planar lightwave integrated component and distributes optical power for multiple wavelengths (1310, 1490, and 1550 nm)There are several factors that go into determining the best OBD 2 port splitter In this article, we've put together a list of the best OBD2 splitters so that you may easily connect many devices to your car. Here is a list of factors you must consider before buying OBD2 Splitter: Length: The length. Check each product page for other buying options.
