

Optical Module Die-cast Base

Overview

This custom die cast module bracket is purpose-built for optical communication equipment, serving as a precision structural component for optical transceivers, data modules, and network devices. Our housings are integrally die-cast from aluminum alloy. Manufactured from premium-grade zinc alloy via high-pressure die casting, the bracket delivers. Die-Casting Base is high-quality die cast components. Die casting is a precision casting method, it uses high pressure to melt metal and then press it into various shapes of metal molds. Once a component. This high-precision die-cast housing is specifically designed for QSFP-DD (Quad Small Form-factor Pluggable – Double Density) optical transceivers. Engineered to meet the rigorous demands of next-generation data centers, it supports eight-lane interfaces for 400G and emerging 800G bandwidth. Since established in 2002, Shenzhen Aoli Casting Hardware Products Co., Ltd has been grown from a professional zinc alloy die-casting manufacturer to a professional enterprise engaged in the research, development, design and manufacture of Optical module components, automation system and processing. This transceiver housing assembly is purpose-built for protecting advanced optical modules while providing robust electromagnetic shielding.
