

Optical module integration with supplier

Overview

This article examines the optical module supply chain ecosystem, explores quality control methodologies, provides vendor qualification frameworks, and offers strategies for mitigating supply chain risks while ensuring the reliability required for demanding AI workloads. NVIDIA is developing a co-packaged optics (CPO) platform that integrates optical and electrical components to improve data-center connectivity, in collaboration with industry partners like TSMC. To help you choose the best partner, this article will analyze and. Optopax offers comprehensive OEM manufacturing services for custom optics and imaging solutions—spanning individual lens elements, precision lens assemblies, AI-enabled camera modules, and fully integrated multimodal imaging systems. From Jensen Huang showcasing CPO switches at GTC 2025 to a wide range of vendors demonstrating optical engines integrated inside ASIC. We provide photonic system integration based on free space, fiber, and waveguide optical interconnects. Our services cover the entire range from design for packaging and prototyping to process development and transfer. For organizations deploying thousands of 800G modules in mission-critical AI training clusters, supply.
