

Outer layer of fireproof cable tray

Overview

It is encased in an outer layer reinforced with fiberglass fabric and aluminum foil, providing excellent performance in the form of a non-combustible blanket. It complies with the API (American Petroleum Institute) 2218 specification and is designed according to the UL1709. Cable tray installation must comply with specific technical standards to ensure electrical safety, system reliability, and long-term maintainability. This document outlines the key requirements for cable tray layout, installation, and fireproofing in industrial and commercial environments.
