

Pakistan 400G Optical Module OSFP

Overview

OSFP 400G Eoptolink's EOLO-134HG-5H-MXX OSFP DR4, 4x100G Optical transceiver module are designed for use in 400 Gigabit links over 500m singlemode fiber. They are operating on 1310nm wavelength, and are compliant with the OSFP MSA. 6T modules, LPO, and high-efficiency thermal designs for ultra-dense data center fabrics. This article introduces the fundamental concept and key characteristics of 400G OSFP Ethernet optical transceivers, and analyzes their practical value in data center and high-speed networking scenarios, with reference to NADDOD's 400G OSFP product portfolio. What Is the OSFP Form Factor?

OSFP. Eoptolink is producing full range of OSFP (Octal Small Form Factor Pluggable) a new pluggable form factor with eight high speed electrical lanes that will initially support 400 Gbps (8x50G or 4x100G). It is slightly wider and deeper than the QSFP-DD but it still supports 32 OSFP ports per 1U front. Optical modules are optoelectronic devices that perform photoelectric and electro-optic conversions. It is designed to accommodate future networks' increasing data rate demands, specifically the 400G Ethernet. The OSFP transceiver is not just about.
