

Panama Fiber Optic Cable Upgrade Project

Overview

- Trans-Caribbean Fiber Systems (TCFS), headquartered in Haiti, will obtain permits to extend its submarine network to Panama, which will benefit connectivity in the Caribbean and Central America by integrating existing routes with new extensions. □□ Strategic Impact This. TAM-1 has been designed to enhance digital connectivity and support the burgeoning data transmission needs of the region. • Cable and DSL networks offer medium speeds and cover older areas. • 4G-based mobile internet is the main way to connect for most residents, though devices like Wilson boosters can help strengthen signals in areas where. □□ Advancement in Regional Connectivity: Concessions for Submarine Cables in Panama In a key step to strengthen Latin America's digital infrastructure, Panama's National Public Services Authority (ASEP) has granted concessions to two international companies for the installation of submarine fiber. Sparkle, the first international service provider in Italy and among the top ten global operators, and Trans Ocean Network, a Panamanian telecommunications company, have agreed to form a strategic joint venture in Panama for the construction of an open landing and connectivity center that aims to. Trans Ocean Network and Ocean Networks, Inc. have signed an MOU for Trans Ocean Network to provide landing party services and infrastructure in the Republic of Panama for the Caribbean Express (CX) submarine cable system.
