

Portable Mauritius Metal Spectrometer

Overview

This rugged 245x250x90mm portable spectrometer delivers fast, precise elemental identification in the field. The 50kV X-ray tube and high sensitivity Si-PIN diode detector provide accurate analysis of metal alloys, impurities, and more. With dimensions of 245mm * 250mm * 90mm and weighing just 1. SPECTROPORT delivers many advantages of SPECTRO's portable OES flagship, SPECTROTEST, in a smaller, lighter package. It. Introducing digital multi-channel technology to small X-ray spectrometer to provide better detection limit, higher stability and wider application. Pharmaceutical Testing Industry XRF (X-ray Fluorescence) is a non-destructive analytical technique used to determine the elemental composition of materials. A portable XRF analyzer enables on-site, real-time.
