

Professional Qualifications for Telecommunication Towers

Overview

Quick Answer: To become a tower technician, complete a training program at a trade school or technical institute (2-6 months for a certificate), then earn required safety certifications (OSHA 10, TTT, Competent Climber/Rescuer). Most training programs can be completed within 3-6 months. No college. NWSA representatives initially defined two levels of telecommunications tower technicians for crew members who perform general construction activities with an emphasis on tower system installation, modification, maintenance, and inspection of support structures used in telecommunications, including. Tower technicians, also known as cell tower technicians or wireless communications technicians, install, maintain, and repair the high structures that support modern wireless networks. What does a tower. This is where Pinnacle Career Institute (PCI) comes in. These professionals are responsible for ensuring that these towers and antenna systems are operating at.
