

Protection Plan for High-Voltage Distribution Boxes at Construction Sites

Overview

This fact sheet explains how to apply the requirements shown in AS/NZS 3012:2019 Electrical installations – construction and demolition sites (AS/NZS 3012:2019), which is called up as a mandatory standard by section 163 of the Work Health and Safety Regulation 2025 (WHS Regulation). This guidance is aimed at those responsible for planning and subsequent management, and those who control the installation and use of electrical systems and equipment on construction sites. This also details the minimum electrical safety clearances, which are used as a basis for the Energy Network Association (ENA) TS 43-8. These standards have been agreed by CENELEC (European Committee for Electrotechnical Standardisation) and also form part of the. Welcome to our 2022 Operational Safety Rules and Associated Safety Manual In 2022 we established a new set of Operational Safety Rules and associated Approved Procedures for the SSEN Distribution business.
