

Protective Fence for Primary Distribution Boxes

Overview

Chain-link fencing: Provides a cost-effective solution with good visibility, making it easier for security personnel to monitor the area. For boundary fencing at these sites and for fencing at distribution substations, steel mesh. SafeFence™ non-conductive perimeter barrier fencing provides safety and security around substations, transformer yards and other utility properties with installed power-delivery assets. The fiberglass wall deters would-be vandals, excludes wildlife, and hides unsightly equipment from growing. Are you looking for effective solutions to protect your employees and machines?

Appealing design and high flexibility in the applications are important to you?

Then the protective fence system from FM SYSTEME is the right solution. As far as security measures go, it is the first line of defense. It provides a delineated boundary that aids in organising logistics operations efficiently, reducing the risk of accidents.
