

Rear-tilting cable tray

Overview

The tiltable design swings open for quick access to power strips and cables, then locks back into place to keep everything hidden. 2 mm steel, it combines strength with convenience for a tidy, practical workspace. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience - for each of these installation challenges and safety. As in the industrial environment. Our cable support. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction. Of course, maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. This tiltable cable tray hides cables and wires but also helps you keep them organized. Our products are available all over the world. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
