

Russian Transimpedance Amplifier QSFP-DD

Overview

This QSFP-DD dual pluggable EDFA booster amplifier offers a optical input range and provides a +20dB nominal gain to a C-Band DWDM link. Each fiber pair link is compliant to 100GBASE-FR1 and thus can support a 400GE to 4x 100GE breakout over 2 km. 5625 GBd PAM4 electrical. QSFP-DD (Quad Small Form-Factor Pluggable Double Density) represents a transformative advancement in optical transceiver technology, addressing the exponential growth in data center bandwidth requirements and the demands of modern high-performance computing environments. It is designed to be compatible with QSFP-DD MSA on mechanical and electrical interface, which allow it be Plug-and-Play in QSFP-DD cage. This makes it a popular choice when upgrading existing infrastructures that already.
