

Single switch for wiring in distribution box

Overview

Learn how to wire a single phase distribution box with an ATS (Automatic Transfer Switch) in this step-by-step tutorial. This video covers the complete wiring process, safety tips, and how ATS switches work in a residential or small commercial setup. Perfect for electricians . A distribution board or distribution box is where the main power supply is distributed to multiple loads. And all the switching and protective devices are installed in the distribution box. It includes isolator, RCCB (Residual current circuit breaker) or RCD (Residual-current device) devices, protective fuses or MCB's (Miniature Circuit Breaker). A consumer unit (CU) also known as panel box, breaker box or fuse box is a type of a distribution board (aka electric panel, breaker panel, panelboard or main breaker-box or main service panel) which is used to distribute and fed the electric power to the sub-circuits and final sub-circuits. Distribution board is a safe system designed for house or building that included protective devices, isolator switches, circuit breaker and fuses to safely connect the cables and wires to the sub circuits and final sub circuits including their associated Live (Phase) Neutral and Earth conductors.
