

Spectrometer Link

Overview

Electronic device that connects to spectrophotometers for seamless instrument control, data management and analysis. SpectroLink™ simply takes over the tedious tasks so you can focus on the science. Are you having problems with SpectroLink™?

Report your problem here and get technical support Which UV-Vis spectrophotometers are supported by SpectroLink™?

Electronic device that. Try the new and improved version of Full Spectrum Viewer in Cytex® Cloud! Use Google Chrome for best performance. Looking for a fluorochrome that isn't listed?

Cytex Cloud contains the most up-to-date and comprehensive fluorochrome data and many more helpful tools! cFluor and ViaDye are trademarks. The Central Facility for Chemical Analytics, CAFCA for short, offers researchers technologies and methods of instrumental analytics as a service or for their own use, thus contributing to the success of research at the Department of Chemistry, JGU and beyond. CAFCA is a core facility in the. The Spectrometry application provides support for experiments including, analysis of emission spectra, absorbance spectra of colored solutions and plant pigments, Beer's law determination of unknown concentrations, and kinetics experiments.
