

Status lights in the distribution box

Overview

A Step-by-Step Guide to Reading Power Status via the Four-Color Lights in Civil Distribution Boxes Check the box's label first. If not, use this standard: Red: Fault/alarm. Steady = major fault (short circuit/overload); blinking = minor (loose connection). There are several status LEDs for each voltage: one LED adjacent to each output one LED at the input A status LED lights up if the corresponding voltage is present and correctly connected. The front panel LEDs are labeled either as in Figure A-1 or as in Figure A-2. Check your device for the specific method utilized. Normal. Knowing your distribution box helps you see which breaker does what. Good labeling of breakers is very important. Use. Indicator lights provide clear visual signals to show the status of electrical circuits and equipment, making them essential for control panels, switchgear, and industrial machinery.
