Surge Protection Distribution Box 6

Overview

Innovative MG composite technology, 0 free flow and 0 leakage current, improve power supply quality and ensure circuit safety; Unique arc protection design, creepage distance up to 10mm, can be used above 2000m above sea level, no need to reduce capacity and no fire. Eaton Protection Box is a best in class multi outlet surge protection device for sensitive and critical equipment in residential or professional environment. It is designed to protect. This requires understanding the exposure risks across your electrical distribution system per the IEEET C62. 1 standard: High exposure (Category C) at service entrances Medium exposure (Category B) at distribution panels Low exposure (Category A) at point-of-use equipment Installing appropriately. Surge protection in main power distributions Incorrectly installed surge protection poses a liability risk for planners and installers of switching devices. Connecting cables that are too long often lead to problems. Very good welcome at the LDLC shop. The types of protection are Outlet Boxes, Outlet Strip, Power Distribution Unit (PDU), Surge Protector, Surge Protection Module, and Surge Protector for Media Lines Only. The current ranges from 150 mA to 310 A.
