

TP-Link Optical-to-Electro-optical Module

Overview

TL-FC311B-2 is a gigabit media converter, providing a gigabit RJ-45 port and a gigabit SC fiber port, which can convert between electrical and optical signals. With the launch of the new Wi-Fi 7 routers BE800 and BE900, our home routers have begun to utilize the high speeds that come with added SFP+ Compatibility. The SFP+ port is a high-speed optical-to-optical signal conversion port, mainly used for 10G Ethernet and Fiber Channel network applications. It easily extends the distance of an existing gigabit network via fiber optic when integrated with the SFP Module. The MC420L applies the IEEE 802.3ae 10GBASE-SR/LR 10G.
