TP-Link switch for optical-to-electrical conversion

Overview

TL-FC311B-2 is a gigabit media converter, providing a gigabit RJ-45 port and a gigabit SC fiber port, which can convert between electrical and optical signals. Can I use the RJ45 SFP module or media converter to bypass the ISP modem?

It depends on your ISP settings. It easily extends the distance of an existing gigabit network via fiber optic when integrated with the SFP Module. The MC420L applies the IEEE 802. And long-distance data transmission through optical fiber can be applied to commercial scenarios such as remote surveillance camera. The MC220L is a media converter designed to convert between 1000BASE-SX/LX fiber and 10/100/1000Base-T copper media. 3z. This is a Fast Ethernet 100Base-TX to Fiber 100 Base-FX converter. Long Range ConnectionsPoint-to-point connections are easily built with the gigabit fiber converters, making them ideal for network.
