

Terminal box OTB

Overview

A Fiber Termination Box (FTB), also known as an Optical Terminal Box (OTB), is a crucial component in Fiber to the Home (FTTH) applications. Its primary function is to efficiently manage and terminate fiber optic cables, connecting the cable's core to a pigtail. By understanding the components, types, and differences between various fiber management devices, businesses can make informed decisions when deploying and maintaining their fiber. An outdoor termination box (often called a fiber optic distribution box or outdoor terminal box) is an enclosed enclosure used in outdoor environments. Fiber optic terminal box includes faceplate and drop cable protection box which can be used as a termination point for the feeder cable to connect with drop cable in FTTx communication network system. This box is made of ABS plastic which makes it lightweight, impact resistant and affordable. It has a white color and an 04 SC simplex adapter (not included). Compliant with IEC, TIA/EIA & RoHS standards.
