

The electrical distribution box is installed in the guest room

Overview

The pre-assembled and pluggable system distributor in the hotel room can be customised. Today, most hotels use high-tech hotel key cards which allow guests easy, secure access to their rooms and avoid excess energy consumption when the guests are not in the room. Nonresidential and hotel/motel buildings shall comply with the applicable requirements of Sections 130. Every single switch, socket, light fitting, low-current socket or direct electrical outlet for another consumer – such as a hairdryer or wall-mounted TV, for example – needs to be coordinated exactly with the design. During the design of an electrical installation for a building, spaces that are required as electrical rooms need to be provided for very early in the planning and design process. I will try to present this in a form of a few basic concepts so that non-electrical readers can benefit from it. There. The new code language requires “ all 120-volt, single-phase, 15- and 20-ampere branch circuits supplying outlets and devices installed in guest rooms and guest suites of hotels and motels ” to have AFCI protection.
