

# The fiber optic cable is full of glue

## Overview

Fiber optic adhesive is a critical component in the manufacturing and installation of fiber optic cables. For manufacturers and industry professionals working with fiber optics, understanding what kind of glue to use on fiber optic. Using the proper adhesive in the assembly of fiber optic components not only saves time and expense, but also can improve reliability and performance. Adhesives for fiber optic components that perform well on glass, metal, ceramic and most plastic substrates provide excellent chemical and solvent. The FOC Termination Epoxy Matrix and UV Curable Optical Adhesive or Fiber Optic Coatings Matrix offer these properties in a comparison format for each material option. A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light.
