

Two-core butterfly optical cable model

Overview

The product is a pre-terminated butterfly flat indoor drop cable assembly, designed as the final access link in FTTH deployment. A steel wire as the additional strength member is also applied. The typical self-supporting bow-type drop. Fiber Optic Drop Cable GJXH 2core Butterfly Indoor Telecom Communication Description : The dished lead-in optical cable (for indoor wiring) for access network is made by centering the optical communication unit (optical fiber), placing two parallel non-metallic stiffeners (FRP) or metal stiffeners. Outdoor single-mode double-core butterfly cable is the signal transmission carrier of modern communication. Once it is not properly protected during on-site construction, once it is damaged, it will cause great losses. 3dB; Return loss >50dB (UPC)/>60dB (APC) (1310nm) Features:.
