

Two routers installed on a telecom fiber optic cable

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. In the basement, there is the ONT+residential gateway device that converts the light impulses to Ethernet. Can I Connect Two. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX. The ISP does not. Are all the strands in the optic fiber cable gonna work at the same time and are they compatible with the transceivers?

Thank you yes, for single-mode modules, you'll need single mode fiber/cable. Check the specs, that the advertised wavelengths and desired distance/length match.
