

Tyco optical module

Overview

Tyco Electronics's family of modular fiber products enhance the design, implementation and maintenance of fiber optic networks - from exchange to customer premises. When it comes to capacity and throughput, no other physical media can come close to matching fiber optics. Tyco Electronics comprehensive fiber optic connector line delivers virtually all industry-standard single fiber/duplex connections including LC, MU, SC, ST, FC, MT-RJ, and others. Tyco. Floating Insert on backplane side contains NanoRF contacts and optical mounts Alignment features provide reliable, stub-free mating Supports CableMT and Edge Mount transceivers allowing additional modularity and options for customers Multiple slot profiles and connector modules added to VITA 65. In the 'customer premises elements'. We offer a broad product range of physical layer components for devices communicating on Media Oriented System Transport (MOST) network. TE Connectivity's (TE) fiber optics provide a complete range of components for MOST 25 and MOST 150 connectors including PCB and harness connectors, cable. Tyco Electronics (TE) launches new compact 40-Gbps QSFP+ optical transceivers, parallel fiber-optical modules with four independent optical transmit and receive channels for increased board density. This new addition to TE's QSFP product portfolio for the broad Ethernet and InfiniBand standards.
