

US MTP Connector

Overview

A trademarked product from US Conec, MTP® is an enhanced MPO connector. Offers tighter tolerances, removable housing, improved insertion loss, and better mechanical performance. Fully compliant with MPO standards and backward compatible. The MTP ® connector design offers novel patented features, enhanced precision, proven reliability, and significant performance improvements compared to the standard MPO. The MTP /MPO is a low-loss multifiber connector with a maximum of up to 72 fibers, based on n x 12-fiber MT ferrules, with cable ports and kink protection for round cables. Multimode MTP /MPO connectors are cut according to the global standard PC 0°, while singlemode connectors are cut to the. Modern Data Centers are adopting Spine-Leaf architectures for increasing East-West traffic and investing heavily in infrastructure to keep up with the growing bandwidth demands of consumers. To reduce costs and accelerate deployment timing, fully factory-terminated cabling options are being used in. MTP® is the acronym for Multi-fiber Termination Push-on, which is a registered trademark of US Conec. Connection integrity is provided by adapter latches which are locked into place on the connector plug by a spring loaded sliding mechanism. Precision alignment is achieved with patented.
