

Upgraded Custom Version of Power Fiber Optic End-Face Inspection Instrument for Private Power Networks

Overview

The FI-7000 FiberInspector Pro is a fiber optic inspection scope that allows you to inspect and certify fiber optic connector end-faces in 1 seconds so you can get the job done the first time. Dirt and contaminant cause insertion loss and back-reflection that inhibits optical transmission and causes havoc with transceivers. Fiber loss and OTDR testing can expose this problem, but in many cases, dirty. Desktop fiber end-face detector for fully automated analysis of multi-core fiber connectors SmartCheck inspection instruments launched by Dimension Technology. With the advantages of Dimension image analysis software and high performance embedded system, AutoCheck can identify the tiny defects accurately, conveniently and simply. The "all-in-one" handheld solution for fiber inspection.
