

Upgraded remote power supply version for use in power systems

Overview

Remote power category RP3 is now mandatory in newly built systems for offices, homes, and industries, and in Smart Building systems. Each cable in a bundle must be able to fully support PoE at the highest level. ABB's Control Room offering includes a comprehensive range of solutions designed to optimize the operator workspace for critical 24/7 processes across various industries. The control room is considered one of the most critical areas in any facility, impacting daily decision-making and overall. Corning's expanded portfolio of high-density, Class 2 remote power solutions support intelligent power aggregation at the edge to deliver up to 800 W of power. Our power solutions are compatible with Corning's ActiFi[®] Composite Cable, connectivity, hardware, and actives portfolio including. The Panduit Fault Managed Power System (FMPS) is a novel remote power delivery system that allows System Integrators to safely and easily deliver power to wireless systems. Depending on the scale of this system, the load could be a couple feet from the source, or thousands of meters away.
