

# Uzbekistan Electrical Distribution Box Size Construction Project

## Overview

Uzbekistan will build 7,000 km of transmission networks to integrate new power plants and energy storage facilities, ensuring regional energy balance. If one region faces a power shortage, additional capacity will be available elsewhere. The project will attract \$4 billion in. WASHINGTON, May 15, 2025— The World Bank's Board of Executive Directors approved today a \$100 million concessional credit to support Uzbekistan's efforts to enhance integration of renewable energy into its electricity distribution networks and improve supply reliability in priority regions. The proposed project will build on the ongoing Loan 4347-UZB, by helping rehabilitate additional 40 critical distribution substations in 13 regions across the country, expand power transformation capacity, and modernize and digitalize the distribution system operations. The energy transition and the development of decarbonised energy production induce an evolution in the electricity production with a direct effect on the. Data collected and prepared for a project of the World Bank Group Modernization and Upgrade of Transmission Substations project in Uzbekistan. This data is based on a digitized PDF map, and so is intended as a schematic of rough locations of the power network. It is not suitable for applications.
