

Vertical T-joint for cable trays

Overview

The Cable Tray T-Joint is a durable and versatile accessory designed to connect cable trays at a 90-degree angle, allowing for organized and efficient routing of cables in industrial and commercial installations. Fitting for the construction of T-joints or crossovers of Metatray® insulating trays for the conduction of electrical and telecommunication cables. Made of PVC-based thermoplastic insulating material. " In 1993 NEC Article 318 there are no requirements for the handling of the thermal contraction and expansion of cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. The MKS and SKS cable tray systems from OBO Bettermann have a long tradition. Our focus has always been on solutions from the field of cable support systems.
