

What is an SDB distribution box

Overview

A sub-distribution board (SDB) is an electrical distribution panel that receives power from a main distribution point (such as a main LV panel or main switchboard) and then distributes that power to downstream circuits. ABB Drives is a global technology leader serving industries, infrastructure and machine builders with world-class drives, drive systems and packages. We help our customers, partners and equipment manufacturers to improve energy efficiency, asset reliability, productivity, safety and performance. In EV charging projects, an SDB is often installed closer to the chargers (for. The power distribution boxes deliver electricity from the main electrical main to other circuits. Main Distribution Board (MDB) 2. In this comprehensive guide, we will explore.
