

What optical modules are used in the Xike switch

Overview

The typical optical modulation that are used include Dual Polarization Quadrature Phase Shift Keying (DP-QPSK) and QAM-16. These modules put the DSP on the module and use a conventional retimed digital interface. Welcome to inquire and place orders. com Moduletek Limited Labs recently purchased a Seeks SKS7300-8GPY4XGS switch, which. Switch optical modules, which convert electrical signals to optical signals and vice - versa, and optical interfaces, which serve as the physical connection points, play a pivotal role in determining the speed, distance, and reliability of data transmission. SFP: Small Form-factor Pluggabletransceiver GBIC: GigaBit Interface Converter XFP: 10-Gigabit small Form-factorPluggable transceiver XENPAK: 10 Gigabit EtherNet TransceiverPAcKage The optical fiber connector The. The elementary components of a basic optical communication consists of Ethernet switch, WDM passive device, optical module etc. This technology allows for high bit rate transmission to be switched between various optical lines.
