

What to do if the fiber optic light on a Xiaomi router turns red

Overview

Don't panic—in this step-by-step guide, I'll walk you through all the proven fixes, from simple reboots to checking your fiber line, to get your internet connection back online as quickly as possible. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. That blinking red LOS light means your router has lost its connection to your internet provider's network. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. Sometimes it may be due to a problem with your internet service provider, although you could also be experiencing this issue due to improper configuration of your router, a poorly connected cable, etc. ☐☐ What the LOS/OPTICAL Red Light Means:

- Blinking Red: No.
