

Why doesn't the KVM 4-input-1-output switch support 144Hz

Overview

Are you using an HDMI to Display port adapter or cable or are you using a standard HDMI cable?

If you are using a HDMI to DP cable or adapter that's the problem. You need to use only an HDMI 2.0 or higher standard cable from the computer to the switch and from the switch to the. Avico's 2x2 Dual Monitor KVM provides a reliable, high-performance solution with fast switching and US-based support. A common mistake users make when setting up their dual monitor KVM switch is. A KVM switch brings a cost-effective and convenient way to manage our daily work and entertainment. It allows us to switch between multiple PCs using just one set of keyboard, mouse, and one (or more) monitor. You won't be able to use two monitors Looking at the KVM/DOCK, it does support two monitors from the desktop, but it needs both the display port and HDMI cable from the equivalent ports on the desktop. I know this is an extremely specific question, but I can't find any other help online. Any ideas are greatly appreciated.
